

Specification of Techspray No Clean Wick Rosin Free Desoldering Braid

PART No. 505-182

Product Information:

Techspray's No Clean Wick Desoldering Braid removes up to four times more solder than conventional wick, and extracts solder much faster than wicks based on Type R fluxes. Our flux has an improved wicking action. The residue left behind is halide free and non-conductive so it does not have to be cleaned in most circumstances. Techspray No-Clean Wick is designed to improve reworking efficiency in both conventional and no-clean operations.

Techspray No Clean Wick is **rosin free**, colophony free, and does not give off a rosin fume.

Ultra-clean!

Independent cleanliness testing (to ISO 9455-17 standard by the National Physics Laboratory) showed excellent stable, repeatable and high SIR measurements. Techspray No Clean Wick leaves little, if any, residues affecting SIR levels. Microscopic examination of the pcb's showed no dendrites. Our desoldering braid is the cleanest! It will give the most reliable desoldering results.

Features & Benefits

- No-clean flux coated braid
- Cleanest wick — clear, non-reactive residues
- Will not leave ionic residue — avoid dendrite failure
- Exceeds MIL-F-14256
- Anti-static spool (except where indicated)

ABOUT KAISERTECH

Founded in 1998, Kaisertech Ltd is situated in Eastleigh, Hampshire.

Through hard work and dedication Kaisertech has grown to be a well-recognized supplier of electronic production equipment and tools.

Specialists in: Soldering, Static Control, Vision, Industrial Furniture, Electric Screw Drivers & Special Projects.
