FAE2-5B

Fume Extractor for 2 Workbenches

The FAE is the **most effective solution to avoid exposure to solder fumes**. The extractor activates and operates only when soldering.

The extractor starts up only when soldering. This function not only saves power, but also extends the life span of the equipment, including the filter.

The FAE2 stand has an **integrated vacuum system** that detects when the tool is at rest and automatically **absorbs excess fumes**.

The FAE2 provides direct **connection of up to 4 soldering or rework stations** and an additional **8 fume extraction stands**.

It can be controlled via JBC Stations, a pedal, a robotic system or a PC.

It has 3 predefined levels of aspiration: low, medium and high. It also features a custom mode where the airflow can be set up within the lowest (10%) and maximum rates (100%).
