Plastic Euro Boxes.

SSI Schaefer.

Euro Boxes allowing for efficient handling in any environment

If presentation of your components or small products is important, the Component Box range provides the perfect solution. Injection moulded from a tough yet visually appealing Polypropylene material, they are the option for exterior printing or labelling to provide further awareness for your brand (and can be used to create “added value” packs for retail use).

The cleverly integrated hinges and catches are durable and easy to use. Optional foam inserts minimise the effects of mishandling, whilst the exterior also protects from moisture, grease, oil and impact. All this and they are available from stock in under 48 hours.

Reliability and durability guaranteed

- > Tough polypropylene material creates strongest / most durable “handling tote” available
- > Minimised damages from mishandling results in less written off stock
- > Combine with interior foam or dividers to further reduce damage caused by mishandling

Improve the efficiency of your operations

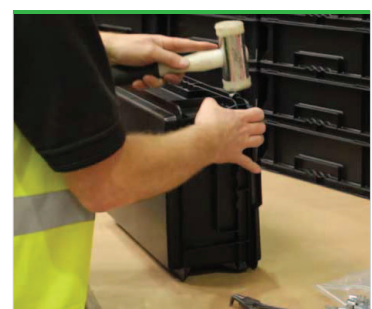

- > Designed to work seamlessly with your existing racking / conveyors etc.
- > 20kg load capacity and moulded rims allow safe stacking and optimum use of storage
- > Handle design allows for easy and efficient handling by production or warehouse staff

Minimise the ongoing costs to your business

- > Strength and durability providing excellent longevity reduces lifetime costs
- > Easily cleaned surfaces to further boost lifespan
- > Resistant to water, oil and grease

Whether used as manual transport containers - or for semi / fully automatic warehousing - SSI Schaefer EF series containers are used throughout all sectors that require efficient storage and handling. Quite simply, they are the toughest moulded tote boxes available today.

Innovators in protective packaging.

About GWP Correx

Expertise in Correx®, fulfilment & returnable packaging

Your company can benefit from unrivalled expertise in the design and manufacture of multi trip packaging and handling products, offered by GWP Correx. From Correx® reusable packaging to SSI Schaefer rigid plastic containers, you can choose from a huge selection of stock and bespoke products, in high or low volumes, on exceptionally short lead times.

The wider GWP Group can also help with any other packaging requirement you may have. Whether you use corrugated boxes, protective cases with foam, handling items, specialist coatings, anti-static packaging or a combination of these, you can source custom designed solutions of the highest quality from a single source.
