40+ PROTECTIVE LUBRICANT

MULTI-PURPOSE MAINTENANCE OIL

Ambersil 40+ is the complete maintenance treatment for protection against corrosion, water displacement, penetration on seized fasteners, lubrication and light surface rust removal. One simple application - by spray, swab or dip - stops the spread of existing corrosion, gives lasting protection against further attack and removes and repels ambient moisture.

The protective, lubricating film is non-conductive and remains operational even at severe sub-zero temperatures. It will not affect paints or plastics and is lastingly effective on all metals, including aluminium. Freshly machined surfaces resist 'finger-printing' and will stay clean and bright, even in highly corrosive conditions.

APPLICATIONS

- Ambersil 40+ is ideal for use on all mechanical and electrical equipment.
- As a penetrant, it will quickly free seized nuts, bolts and bearings, whilst the highly effective water displacing properties make 40+ the perfect 'damp-start' solution for ignition systems and other electrical equipment.

MATERIALS COMPATIBILITY

OK

- Rubber: No visible affect when sprayed. Most rubbers will swell after prolonged immersion
- Paintwork: No affect on surface. Wax polishes and coatings may be softened after prolonged exposure
- Plastics: No visible affects after 240 hours immersion of formica, acrylic sheet, polyester glass fibre laminate, epoxy glass fibre laminate, vinyl sheet and ebonite

CAUTION

Although not always necessary, removal of 40+ from surfaces to be painted is recommended

NOT OK
