APPLICATIONS

A blue, non-silicone, protective coating for use on moulds and other metallic parts and components. The highly visible blue dye indicates total tool surface coverage. The dry, waxy film will not harden or crack and is easily 'moulded-off' when recommencing production. Alternatively, the film can be easily removed using an Ambersil solvent cleaner.

DIRECTIONS

- Apply an even coating to all surfaces to be protected from 9" - 12" (25 - 30cm).
- Ensure that the surfaces have cooled to below 35°C to ensure optimum film formation.
