

QUICK 957 Pro

Digital Hot Air Rework Station

Controlled hot air rework in a compact format

The QUICK 957 Pro is a 580W hot air rework station designed for electronics production, repair and maintenance. Microcomputer zero-crossing temperature control provides precise, stable heating, while adjustable airflow allows the station to be configured for a wide range of rework tasks.

100-500°C

Temperature range

580W

Power output

40 L/min

Maximum airflow

3 channels

For convenient operating presets

Designed for precise, repeatable rework

The 957 Pro combines straightforward controls with the key functions required for day-to-day hot air rework.

Microcomputer temperature control	Zero-crossing temperature regulation provides controlled heating across the 100°C to 500°C operating range.
Clear LCD display	Operating temperature and settings are clearly visible, making adjustment quick and straightforward at the workstation.
Adjustable airflow	Airflow can be set from 1 to 100, with a maximum air volume of 40 L/min to suit different components and heating requirements.
Three-channel operation	Three channels provide convenient access to commonly used settings for repeat rework tasks.
Magnetic auto-sleep	The integrated magnetic control system automatically places the station into sleep mode when the hot air handle is returned to its holder.
Automatic cooling	After use, automatic cooling helps reduce thermal stress on the heating element and supports a longer heater service life.

Quality in the details

The supplied product information highlights practical design details intended to support efficient operation, durability and everyday bench use.

Magnetic control auto-sleep

Returning the hot air handle to its holder activates the magnetic auto-sleep function, reducing unnecessary heater operation between tasks.

Clear LCD interface

The front display presents temperature and airflow information clearly, with straightforward controls for day-to-day adjustment.

Automatic cooling system

After operation, automatic cooling helps protect the heating element and support a longer heater service life.

Compact bench footprint

Dimensions of approximately 110 x 180 x 151 mm make the 957 Pro a space-efficient choice for production and repair benches.

Lightweight construction

At approximately 1.6 kg, the station can be positioned easily within flexible workstation layouts.

Three-channel control

Three channels provide convenient access to commonly used operating parameters for repeat rework tasks.

Built for practical rework

A straightforward control layout, compact housing, magnetic auto-sleep and automatic cooling make the 957 Pro well suited to everyday electronics rework environments.

Technical specification

Model	QUICK 957 Pro
Power	580W
Operating voltage	220V AC
Temperature range	100°C - 500°C
Airflow setting	1 - 100
Maximum airflow	40 L/min
Channel control	3 channels
Dimensions	Approx. 110 x 180 x 151 mm
Weight	Approx. 1.6 kg

What's included

The 957 Pro is supplied with the main station, hot air handle, handle holder, power supply cord, earth/ground wire and three hot air nozzles.

Nozzle	Diameter
E0005	5 mm
E0064	6.4 mm
E0084	8.4 mm

QUICK 957 Pro

Compact, controlled hot air rework with intelligent everyday features.
